Design Patterns

Creational Pattern

Provides object
creation
mechanism

Structural Pattern

Explains how to
assemble objects
and classes into
larger, flexible
structures

Behavioral Pattern

Deals with
algorithms and
assignment of
responsibilities
between objects

Design Patterns

Behavioral Pattern

Concerned with communication between the objects, and their responsibilities

Behavioral Design Patterns

Chain of responsibility

Command

Iterator

Mediator

Memento

Strategy

Visitor

Observer

Template method

State

Behavioral Design Patterns

Strategy

Observer

Behavioral Design Patterns

Strategy

Defines a family of algorithms, encapsulate each into separate class, make objects interchangeable

Observer

Solution: Strategy Pattern

Strategy Pattern

Strategy

To use different variants of algorithm within an object and be able to switch from one algorithm to another during runtime

When the class has massive conditional operator for different variants of same algorithm

Behavioral Design Patterns

Strategy

Define a family of algorithms, encapsulate each into separate class, make objects interchangeable

Observer

Behavioral Design Patterns

Strategy

Define a family of algorithms, encapsulate each into separate class, make objects interchangeable

Observer

Define a subscription mechanism to notify the changes in one object to all its observer dependent objects

Subscriber/Observer

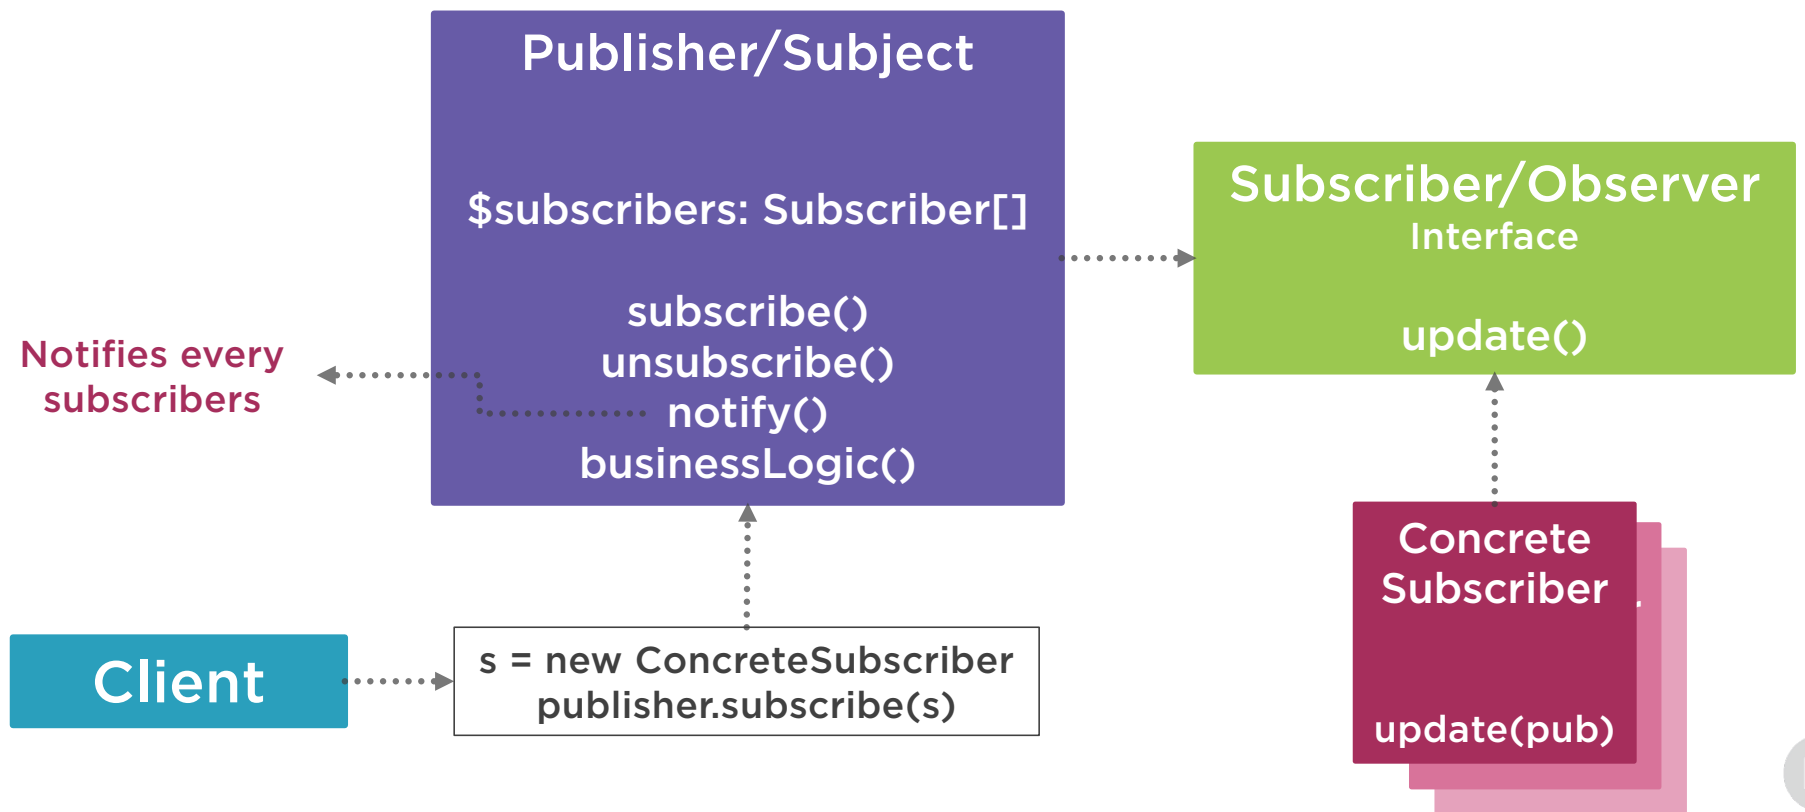

Observer Pattern

Observer Pattern

Observer Pattern

Observer

Used when changes to state of one object require changing other objects

- an object observes other object and changes accordingly

Summary

Behavioral pattern for designing the communication algorithm between the objects

Strategy pattern encapsulates each algorithm and let a class use them interchangeably

Observer pattern lets an object subscribe to the state of another object, to observe the changes and update accordingly

Behavioral Pattern in PHP

Design Patterns

These are just blueprints and not magic potions

Your application doesn't necessarily need a design pattern

Gauge before implementing

Keep your code simple
